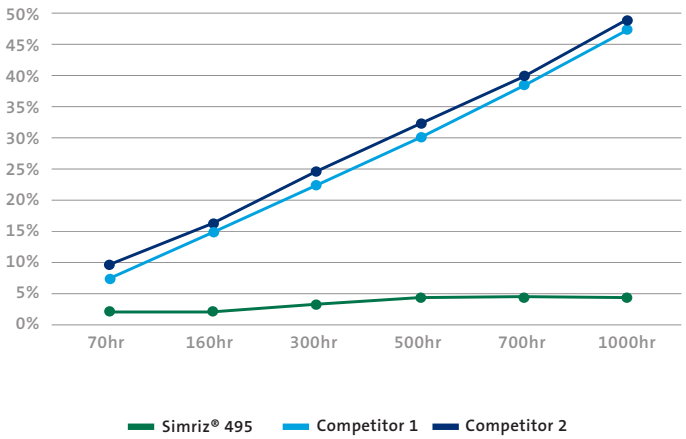
SIMRIZ® 495 GENERAL PURPOSE FFKM MATERIAL

Designed for thermal stability and nearly universal protection against chemical attack, Freudenberg–NOK's proprietary family of Simriz® perfluoroelastomer compounds offer premier sealing performance. Simriz® compounds approach PTFE chemical resistance while resisting high temperatures up to 325°C.

Freudenberg-NOK is the only vertically integrated supplier of perfluoroelastomer.
Traceable - Accountable – Customized - Controlled.

Simriz® 495 performs well in a wide variety of harsh chemicals as well as under overheated steam and hot water conditions. Especially its outstanding performance in strong acids and oxidizers makes Simriz® 495 the perfect match for nearly every application in the chemical process industry.

Volume Swelling 69% Nitric Acid at 80°C/176°F



VALUES FOR THE CUSTOMER

- Broad chemical resistance in a large number of harsh chemical environments
- Outstanding performance under steam and hot water conditions
- High resistance against strong acids and oxidizers
- Without equal. Patented cross-linking system provides superior performance beyond the limits of every other competitor FFKM product
- Demonstrated performance. Successfully used in many customer applications
- Vertically integrated. Freudenberg-NOK Sealing Technologies is the only vertically integrated O-ring manufacturer in the world
- Cost efficient. As the only vertically integrated O-ring manufacturer down to the monomers Freudenberg-NOK Sealing Technologies is able to provide the most cost efficient FFKM O-rings

TYPICAL APPLICATIONS

- Pumps
- Valves
- Paint Spray Equipment
- Mechanical Seals
- Dispenser Systems
- Vacuum Components
