RE: ESP International PFAS per- and polyfluoroalkyl substances

I hope this letter finds you well. We greatly appreciate your continued partnership and trust in our products and services.

I am writing to address recent inquiries regarding the presence of per- and polyfluoroalkyl substances (PFAS) in our products. As you may be aware, there has been growing concern and regulatory scrutiny surrounding PFAS compounds due to their potential environmental and health impacts.

Currently, our company has decided not to declare the presence of PFAS in our products until there is an official legal decision from both the European Union and relevant government authorities. We believe it is prudent to wait for clear regulatory guidance before making any declarations regarding PFAS content.

However, I want to assure you that we take the issue of PFAS seriously, and we are committed to ensuring the safety and compliance of our products. In line with this commitment, our team can provide detailed information on a part-by-part basis to confirm whether an item contains PFAS or not. This tailored approach allows us to address any specific concerns you may have regarding PFAS content in our products.

We understand the importance of transparency and compliance with regulations, and we remain vigilant in monitoring developments related to PFAS regulations. Our goal is to provide you with the highest quality products while upholding the highest standards of environmental responsibility.

If you have any further questions or require additional information, please do not hesitate to contact us. We value your partnership and look forward to continuing to serve you.

Thank you for your understanding and continued support.

Sincerely,

Sincerely,

Ryan Hamilton
